

## STREETSIREN DOUBLE DECK

Security service providers can print their logo and contact information on the front panel of an outdoor siren. Located at the building, it will serve as an additional marketing channel that reaches new customers: neighbors and visitors.

StreetSiren DoubleDeck is flexible when it comes to settings which makes it as relevant in a quiet gated community as in a loud industrial area. The buzzer can be set to generate sound from 85 to 113 dB for an adjustable period: 3 to 180 seconds. Or it can be completely silent when the device is set to respond to alarm triggerings only with LED indication. The Ajax app allows engineers to choose detectors that activate the siren. It helps to prevent awkward situations when neighbors are notified every time that a washing machine leaks.

## Specification

Type of siren Wireless	
Installation method Outdoors/Indoors	
Compatibility Operates only with Hub, Hub Plus, Hub 2 and ReX	
Type of notification Sound/light	
Sound volume level Adjustable, 85-113dB at a distance of 1m	
Alarm duration Adjustable, 3-180s	
Indication of armed / disarmed status Available	
Power Supply Battery: Four CR123A batteries, 3V	
Mains supply: DC 12 V±20%	
Battery life Up to 5 years	
Jeweller radio tech  Communication range with central unit - up to 1500m in an open space Two-way communication between devices	
Operating frequencies - 868.0-868.6MHz	
Self-adjusting RF output power - up to 25 mW	
Block encryption based on AES algorithm	
Detector polling period - 12-300s	
Temperature sensor Available	
Operating temp range From -25°C to +60°C	
Permissible humidity Up to 95%	
Ingress protection rating lp54	
Anti-sabotage Forgery prevention	
Jamming detection	
Tamper-resistant	
Remote config and testing Available	
Dimensions 200 x 200 x 51mm	
Weight 528g	
Complete set StreetSiren DoubleDeck	
SmartBracket mounting panel	
Installation set	
Users guide
