# Strobe Driver Module

Part No. **SDM**

Overview

Used in conjunction with an XSB or XSA strobe to provide visual indication of a ringing SigTEL Type A (fire telephone) or Type B (disabled refuge) outstation.

Can also be used to trigger a compatible 12V DC sounder (max.peak output current of sounder must notexceed1A).

Power to operate the strobe or sounder must be derived from a separate 12V DC PSU.
