RECEIVERS/ RX26-MF - Mains powered universal

Product description

The RX26-MF is a mains powered universal receiver with a memory capacity of 85 transmitter buttons.

The input and output are both 230Vac, making it ideal for switching mains powered electrical devices.

Key features

- Mains powered universal receiver
- 85 transmitter memory
- Input: 230Vac
- Output: 230Vac

 *Certification*

 *DEEE*

 *Certification*

 *IP40*

 *-10°C to 50°C*

Product Information

Type: Superheterodine
Frequency: 433.92MHz
Modulation: AM/ASK
Coding: Hopping Code Keeloq®
Relay: 1

Electrical specifications

Input Load: 50 Ohm
Power supply: 230Vac - 50Hz
