

## Datasheet

### RECEIVERS/ RX26-GDR - Garage door receiver

#### Product description

The RX26-GDR is small and convenient, making it ideal for garage door operation or any controller requiring a radio operated normally open trigger.

The relay output can be set to pulse (1 second) or timed with a maximum time of 30 seconds.

The receiver is compatible with all TX26 transmitters.

#### Key features

- Receiver for operation of garage doors
- Up to 85 transmitter memory
- Compatible with TX26 CDVI transmitters
- Simple set up
- For internal use only

## Product Information

**Material:** Polycarbonate housing

**Frequency:** 433.92MHz

**Modulation:** AM/ASK

**Coding:** Keeloq® Rolling code

**Relays:**

Number of relays: 1

Operating mode: Pulse, timed

**Memory capacity:** 85 transmitters

## Electrical specifications

**Operating Voltage:** 12/24 Vac/dc

**Max power on relay output:** 24VA
